

Cuby Hospitality + Cuby G4

- Allows guests to control the A/C from their phone.
- Activates and deactivates control based on check-in/out*.
- Can be integrated with the hotel's PMS.
- Prevents the A/C from being left on after the guest leaves.
- Quick implementation without taking rooms out of service.
- Low-cost, wireless solution.

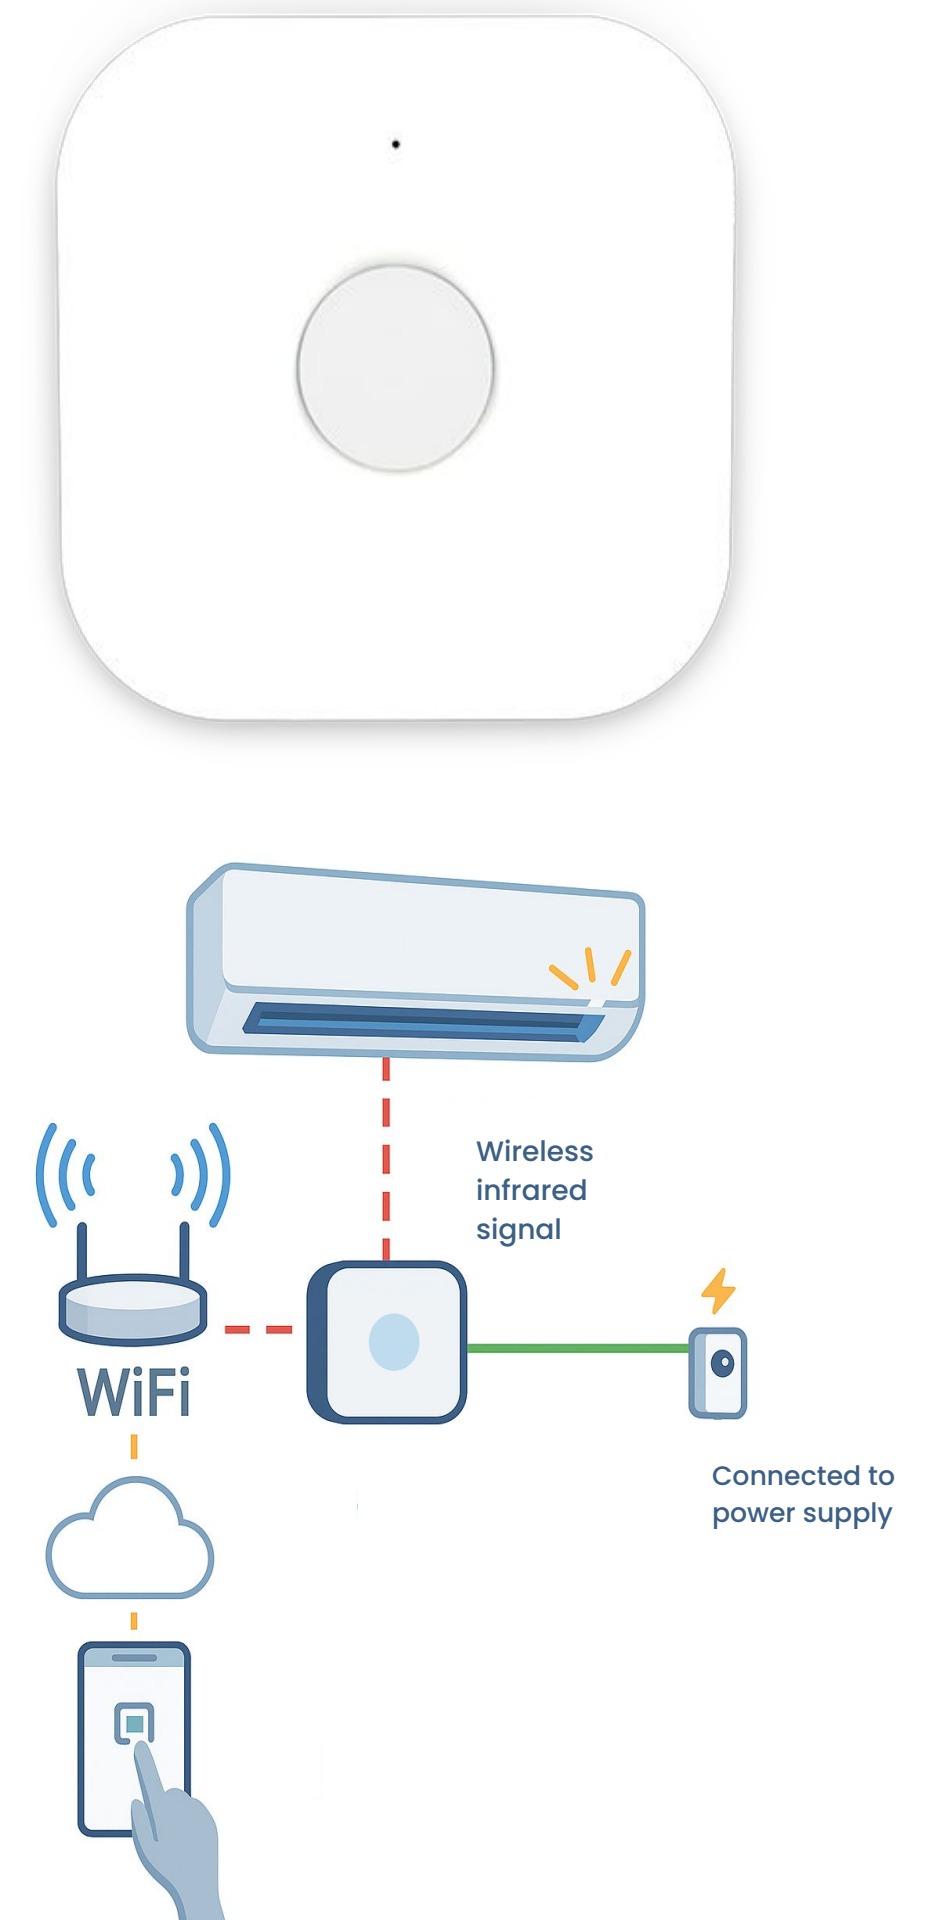

**Via PMS integration, subject to implementation.*

Cuby Hospitality + Cuby G4

- The guest controls the A/C from their phone only during their stay.
- When they check out*, control is automatically deactivated.
- Set customizable temperature limits.
- Automate A/C auto-shutdown.
- Enhances the hotel's tech-savvy image.
- Quick installation without affecting room availability.
- Centralized control of all A/C units from a single platform.
- Controls the A/C via infrared.

**Via PMS integration, subject to implementation.*
